

**PRESS RELEASE FROM THE « KRYPTOSPHERE® »
NETWORK**

INTERNATIONALISATION ANNOUNCEMENT

APRIL 29th, 2024

We are proud to announce that the year 2024 marks our international expansion. Founded in 2017, our community is now expanding across Europe, both in London and Belgium.

After seven years of democratizing certain financial technologies (Bitcoin, crypto-assets, blockchains) and non-financial technologies (Artificial Intelligence and cybersecurity) throughout France, we are pleased to inform you of the official creation of new branches in London, at [Hult Business School](#) and [OMNES Education London](#), as well as near Brussels (Mons, Belgium), at the [Haute École en Hainaut \(HEH\)](#).

This internationalisation has been made possible by the ambition, energy, and motivation of our members, who, since our creation in 2017, have continuously pushed and crossed the boundaries of what is possible in financial and technological education, serving all generations. This expansion is also supported by the commitment of our partners, including companies and associations, which make a significant contribution to our growth and reputation.

Leveraging our diversity, values, and objectives, we aim to extend our activities beyond our national borders to impact more people, communities, cultures, and countries. The activities of these new international branches will be as innovative and diverse as they are complementary to the activities of our French branches:

- [KRYPTOSPHERE® LONDON](#) will develop activities specifically related to Fintech and the traditional market finance sector.
- [KRYPTOSPHERE® BELGIUM](#) will strengthen our most technical activities and profiles, particularly through organizing and participating in international hackathons.

The KRYPTOSPHERE® network's sole common objective is to firmly establish its branches within their respective ecosystems. If you wish to actively participate in our national and/or international development by joining us or supporting us, please contact us through our social media channels or via our website.
